# TACTICAL LINE

Mission-Ready. Built for Action.

**MADE IN  
SWEDEN**

# TACTICAL FEATURES

When every second counts and conditions are unpredictable, the Telesteps Tactical Line delivers. Designed for professionals operating under extreme pressure, these telescoping ladders combine strength, adaptability, and mobility.

## THREE PEOPLE AT THE SAME TIME

There can be three people on the Tactical ladder at the same time, making it possible for two people to rescue a third person from distress to safety, or quicker movement for the group.

## BRING IT EVERYWHERE

Due to its compact nature, it is particularly useful in tight spaces such as stairs, elevators, etc.

## HEAVY EQUIPMENT

The strong design of the ladder makes it possible for the users to carry heavy equipment, as it has a total capacity of up to 500 kg.

## RIGHT HEIGHT EVERY TIME

One of the key features of a telescopic ladder is the possibility to choose the right height for each specific situation.

## ALWAYS WITH YOU

The compact ladder fits in any vehicle and will be available when you need it.

# SAFETY, SPEED AND DISCRETION

The Telesteps Tactical Line is a high-performance telescopic ladder designed for military, police, and security professionals operating in high-pressure, low-visibility environments.

With an all-black powder coating finish on the rungs and side tubes even when fully extended, it offers the discretion needed for tactical missions while maintaining the full strength and reliability expected from Telesteps.

Supporting up to 500 kg or 3 users at once, the Tactical Line features our triangular tube design, making it the strongest telescopic ladder in its class. It can be deployed quickly to a specific height using clear height indicators, helping users act fast under pressure. The ladder is compact and fits easily into any vehicle. It is ideal for use in tight spaces like stairwells or other narrow access points.

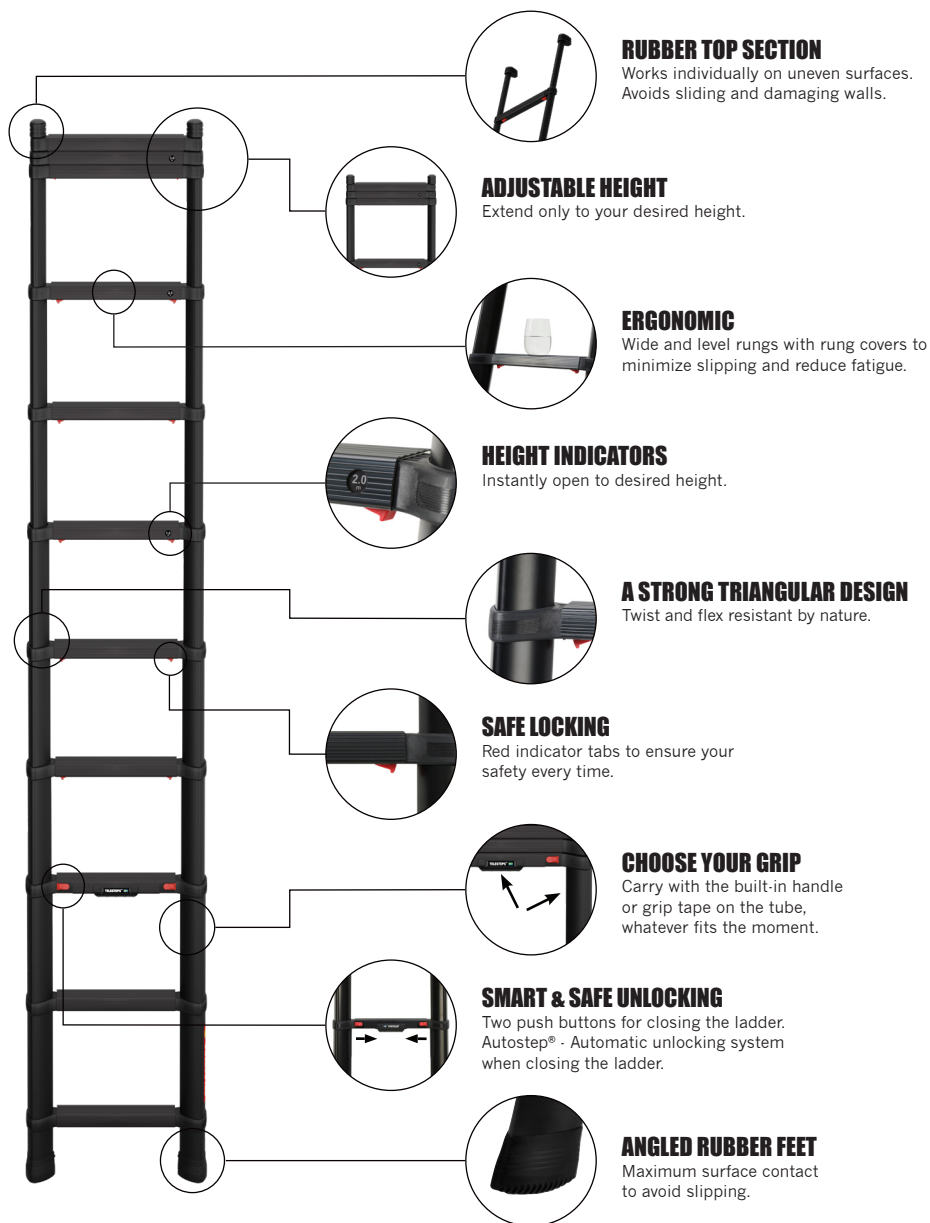

With wide, non-slip rungs, angled rubber feet, and smart unlocking with Autostep®, the Tactical Line is engineered for both safety and speed. Add the Telesteps Adjustable Safety Feet for secure positioning on uneven terrain.

# IT'S ALL IN THE DETAILS

A ladder is a ladder they say. But we know that it is the small details creating the big difference.

# CHOOSE THE RIGHT ONE

Our Tactical Line is available in two different heights.

Depending on the purpose of the Tactical Line we have two different options to choose from. The ladder is available in two different sizes: 3,5 and 4,1 meters.

## TACTICAL LINE 3,5 M

Art. No.	73735-521
Tread width	50 mm
Working height	4,3 m
Length, closed	1,12 m
Width	0,47 m
Weight	15,0 kg
Max load	500 kg
Max users	3

## TACTICAL LINE 4,1 M

Art. No.	73741-521
Tread width	50 mm
Working height	5,0 m
Length, closed	1,17 m
Width	0,47 m
Weight	19,2 kg
Max load	500 kg
Max users	3

Many years ago we created an icon in the world of ladders and today we are recognized as the world leader in telescopic work tools. With our R&D and world class production based in Sweden, our brand and products are renowned for its quality and design by our users worldwide, ensuring we always put safety and quality first.
